Room capacity in 3rd quarter of 2017

As of 2017, further accommodations (both hotels and guest houses) have been added on to the statistics. Also, there was a minor adjustment for accommodations which were closed down. Such a change may impact the overall statistics in comparisons relative to previous.

On the Q3, 55 establishments have been sampled where 36 offered their accommodation services all year around and 19 since the end of the spring until (approximately) the end of the summer.

The size of room capacity is less susceptible to changes, as the accommodations adjust their capacity according to demand.
